

The Modern Database for Enterprise Applications

December 7, 2021

Disclaimer

This presentation by Couchbase, Inc. (“Couchbase,” the “Company,” “we,” “us” or similar terms) contains forward-looking statements. These statements may relate to, but are not limited to, financial and business trends and strategies, guidance and expectations of future performance, the calculation of metrics, capital expenditures, plans for growth and future operations, technological capabilities, strategic relationships and the impact of the COVID-19 pandemic and any associated economic downturn on our business and results of operations, as well as assumptions relating to the foregoing. Forward-looking statements are inherently subject to risks and uncertainties, some of which cannot be predicted or quantified. In some cases, you can identify forward-looking statements by terminology such as “may,” “will,” “should,” “could,” “expect,” “plan,” “anticipate,” “believe,” “estimate,” “predict,” “intend,” “potential,” “would,” “continue,” “ongoing” or the negative of these terms or other comparable terminology. You should not put undue reliance on any forward-looking statements. Forward-looking statements should not be read as a guarantee of future performance or results and will not necessarily be accurate indications of the times at, or by, which such performance or results will be achieved, if at all.

Forward-looking statements are based on information available at the time those statements are made and on management’s good faith beliefs and assumptions as of that time with respect to future events and are subject to risks and uncertainties that could cause actual performance or results to differ materially from those expressed in or suggested by the forward-looking statements. In light of these risks and uncertainties, the forward-looking events and circumstances discussed in this presentation may not occur and actual results could differ materially from those anticipated or implied in the forward-looking statements. These risks and uncertainties are described in greater detail under the section titled “Risk Factors” in the quarterly report on Form 10-Q that we have filed with the Securities and Exchange Commission (the “SEC”) and include, among others, our ability to retain or increase sales to existing customers; our ability to attract new customers; our future financial performance, including trends in revenue, cost of revenue, operating expenses and key metrics, such as annual recurring revenue; our ability to achieve or maintain profitability; the demand for our database and services in general; our ability to protect and enhance our brand; and our ability to compete successfully. Except as required by law, Couchbase does not undertake any obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future developments or otherwise.

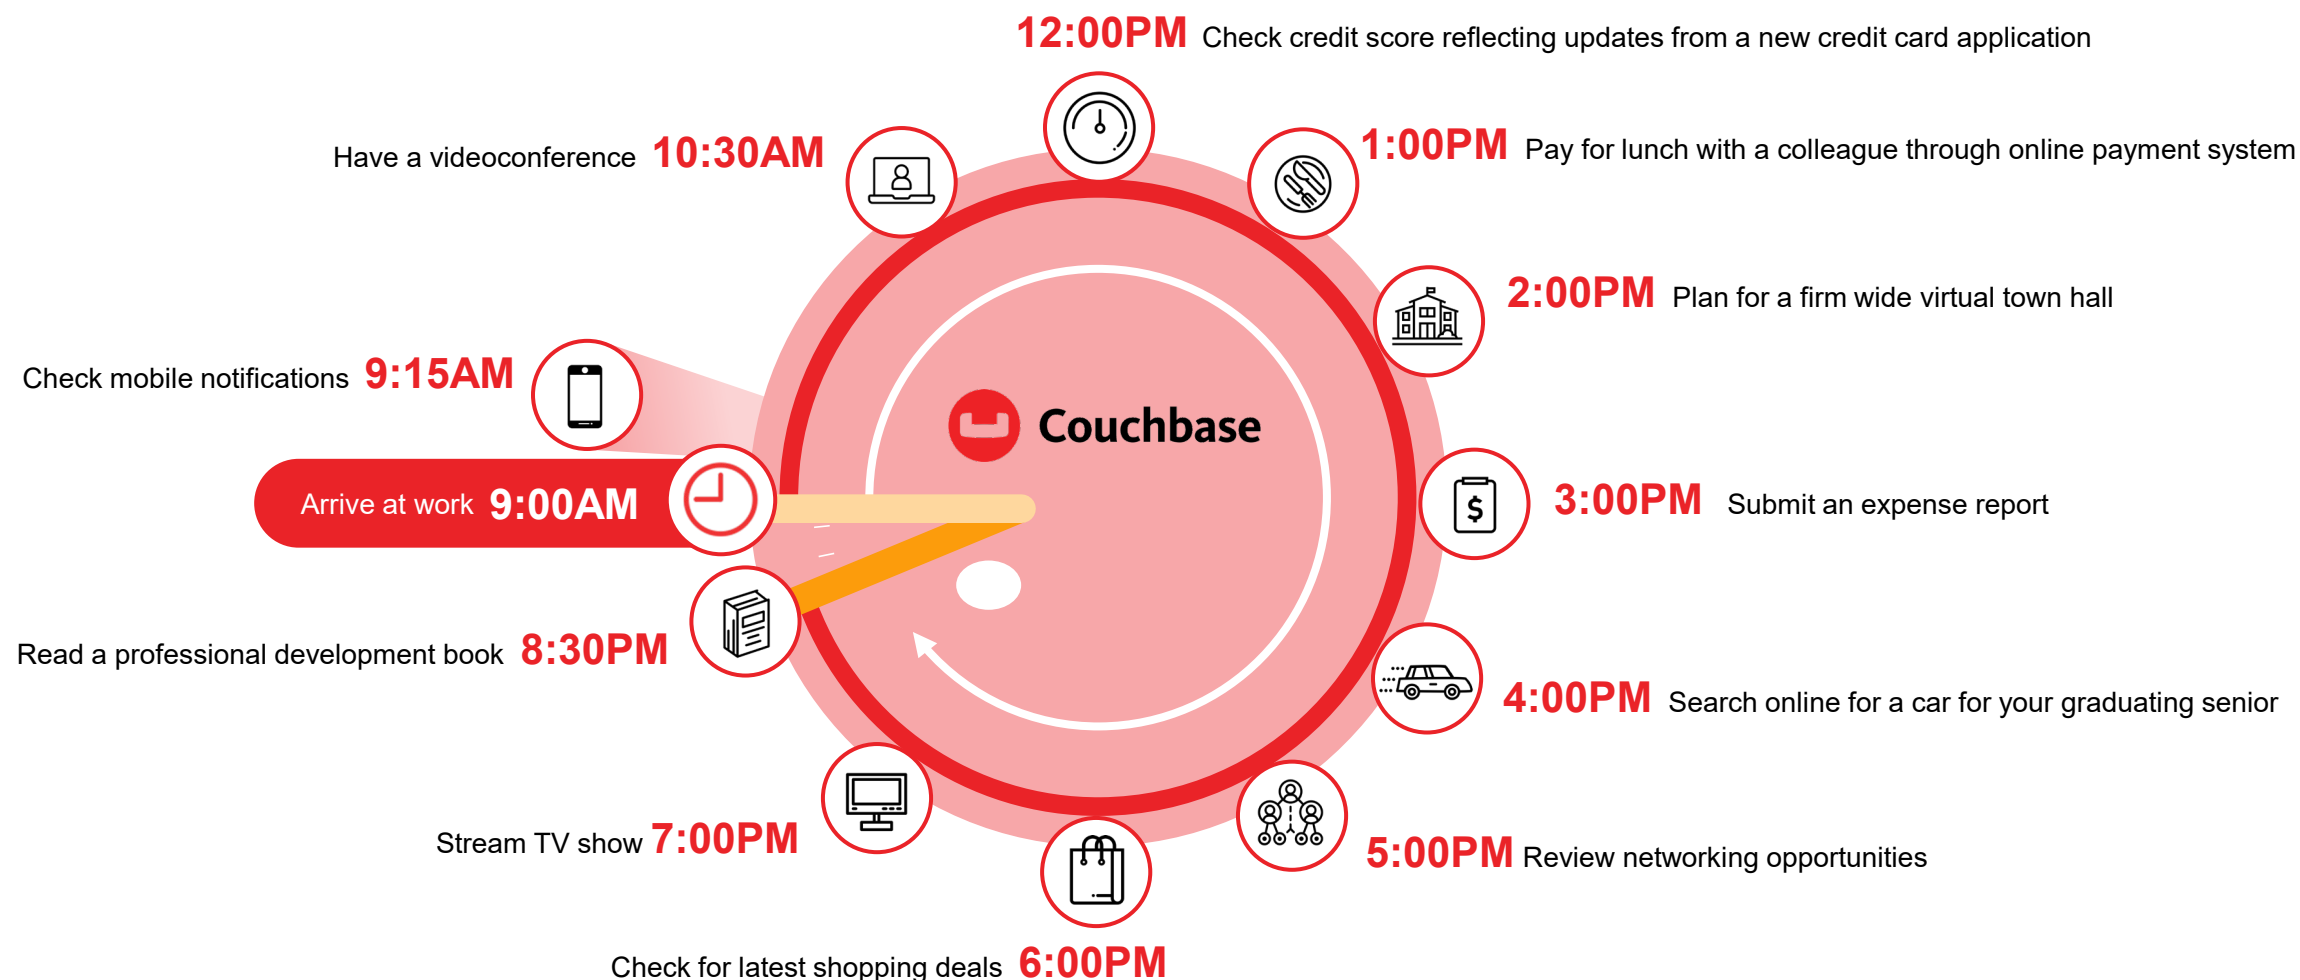

Disclaimer (cont'd)

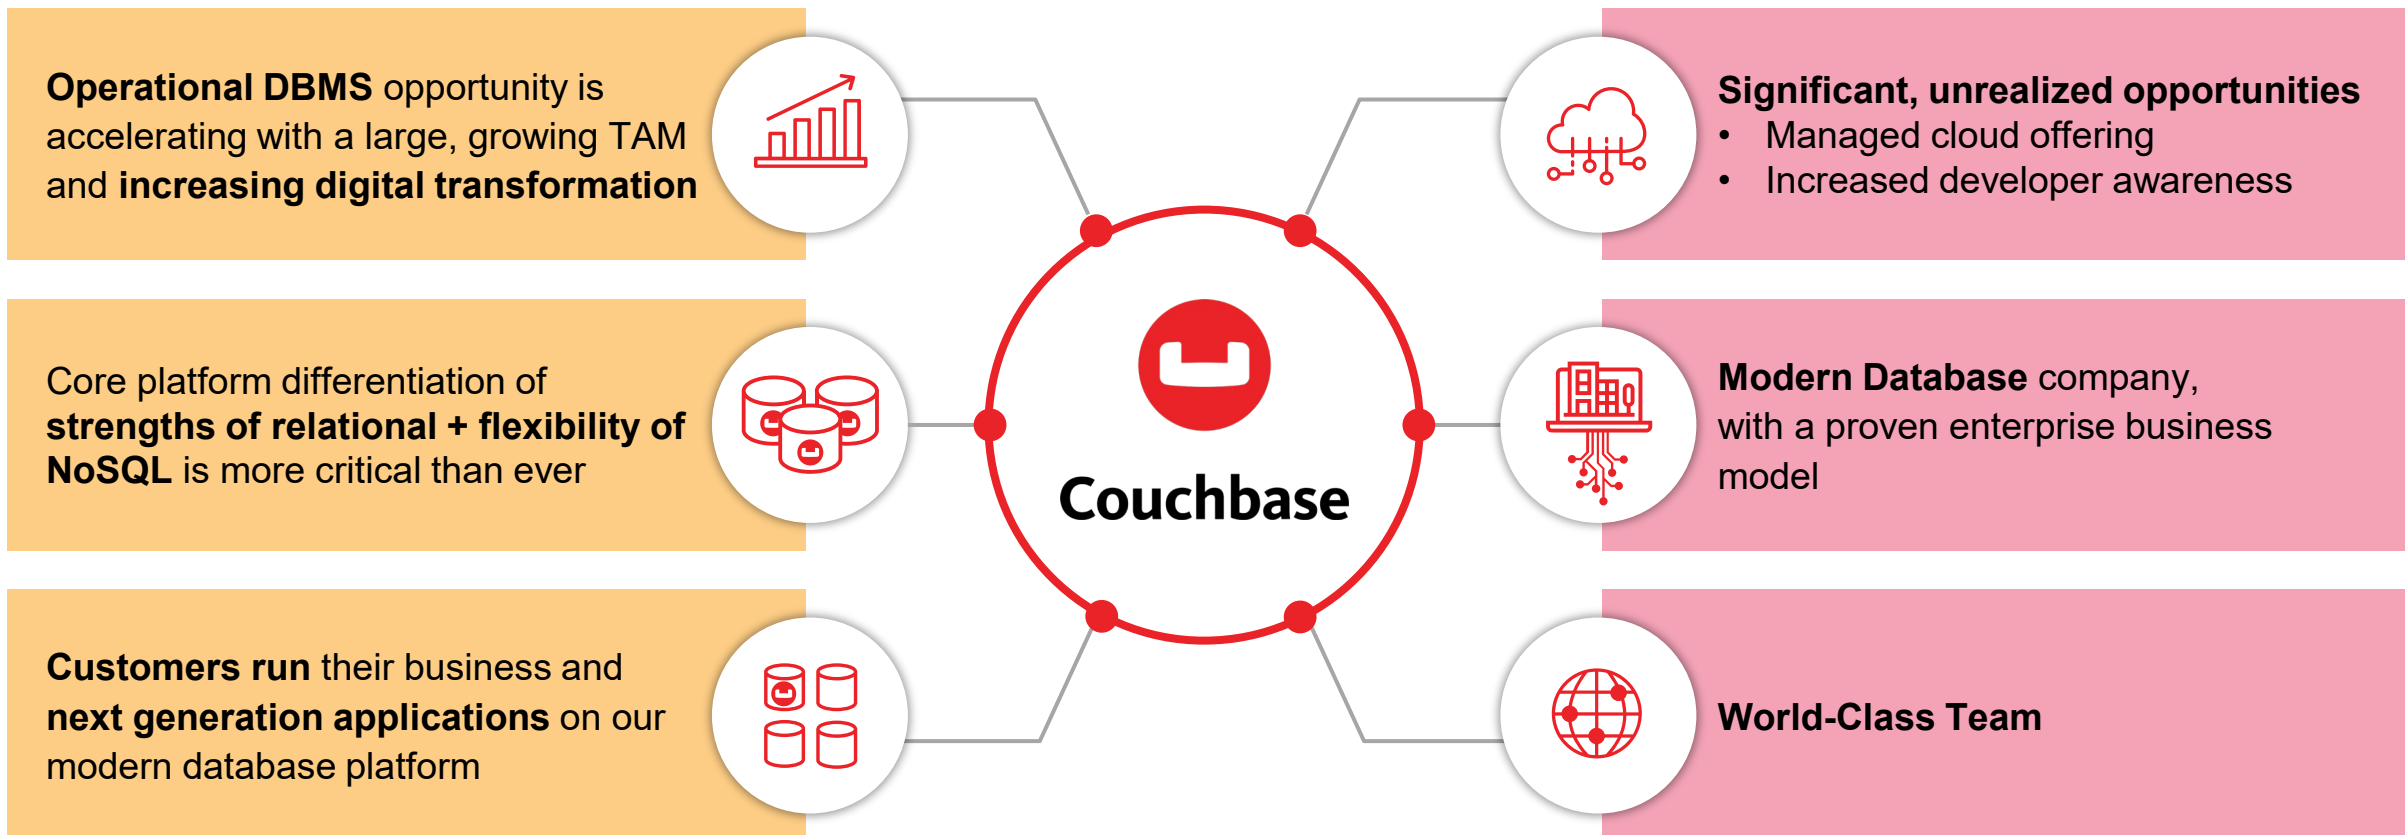

In addition to financial information presented in accordance with U.S. generally accepted accounting principles (“GAAP”), this presentation includes certain non-GAAP financial measures, including non-GAAP gross profit, non-GAAP gross margin, non-GAAP operating loss and non-GAAP operating margin. These non-GAAP measures are presented for supplemental informational purposes only and should not be considered a substitute for financial information presented in accordance with GAAP. These non-GAAP measures have limitations as analytical tools, and they should not be considered in isolation or as a substitute for analysis of other GAAP financial measures. A reconciliation of these measures to the most directly comparable GAAP measures is included at the end of this presentation.

This presentation contains statistical data, estimates and forecasts that are based on independent industry publications or other publicly available information, as well as other information based on our internal sources. This information involves many assumptions and limitations, and you are cautioned not to give undue weight to such information. We have not independently verified the accuracy or completeness of the information contained in the industry publications and other publicly available information. Accordingly, we make no representations as to the accuracy or completeness of that information nor do we undertake to update such information after the date of this presentation.

A Day in the Life Powered by Couchbase

The Modern Database for Enterprise Applications

Customers Drive Demand for Highly Interactive Applications

I. Legacy Databases Insufficient

INTERACTIONS - IoT & CONSUMER

1K - 1M:1

SQL-Compatible

TRANSACTIONS

1:1

Microservices architecture at scale, with performance to match

Legacy monolithic infrastructure not an option with modern workloads

II. NoSQL Emerges

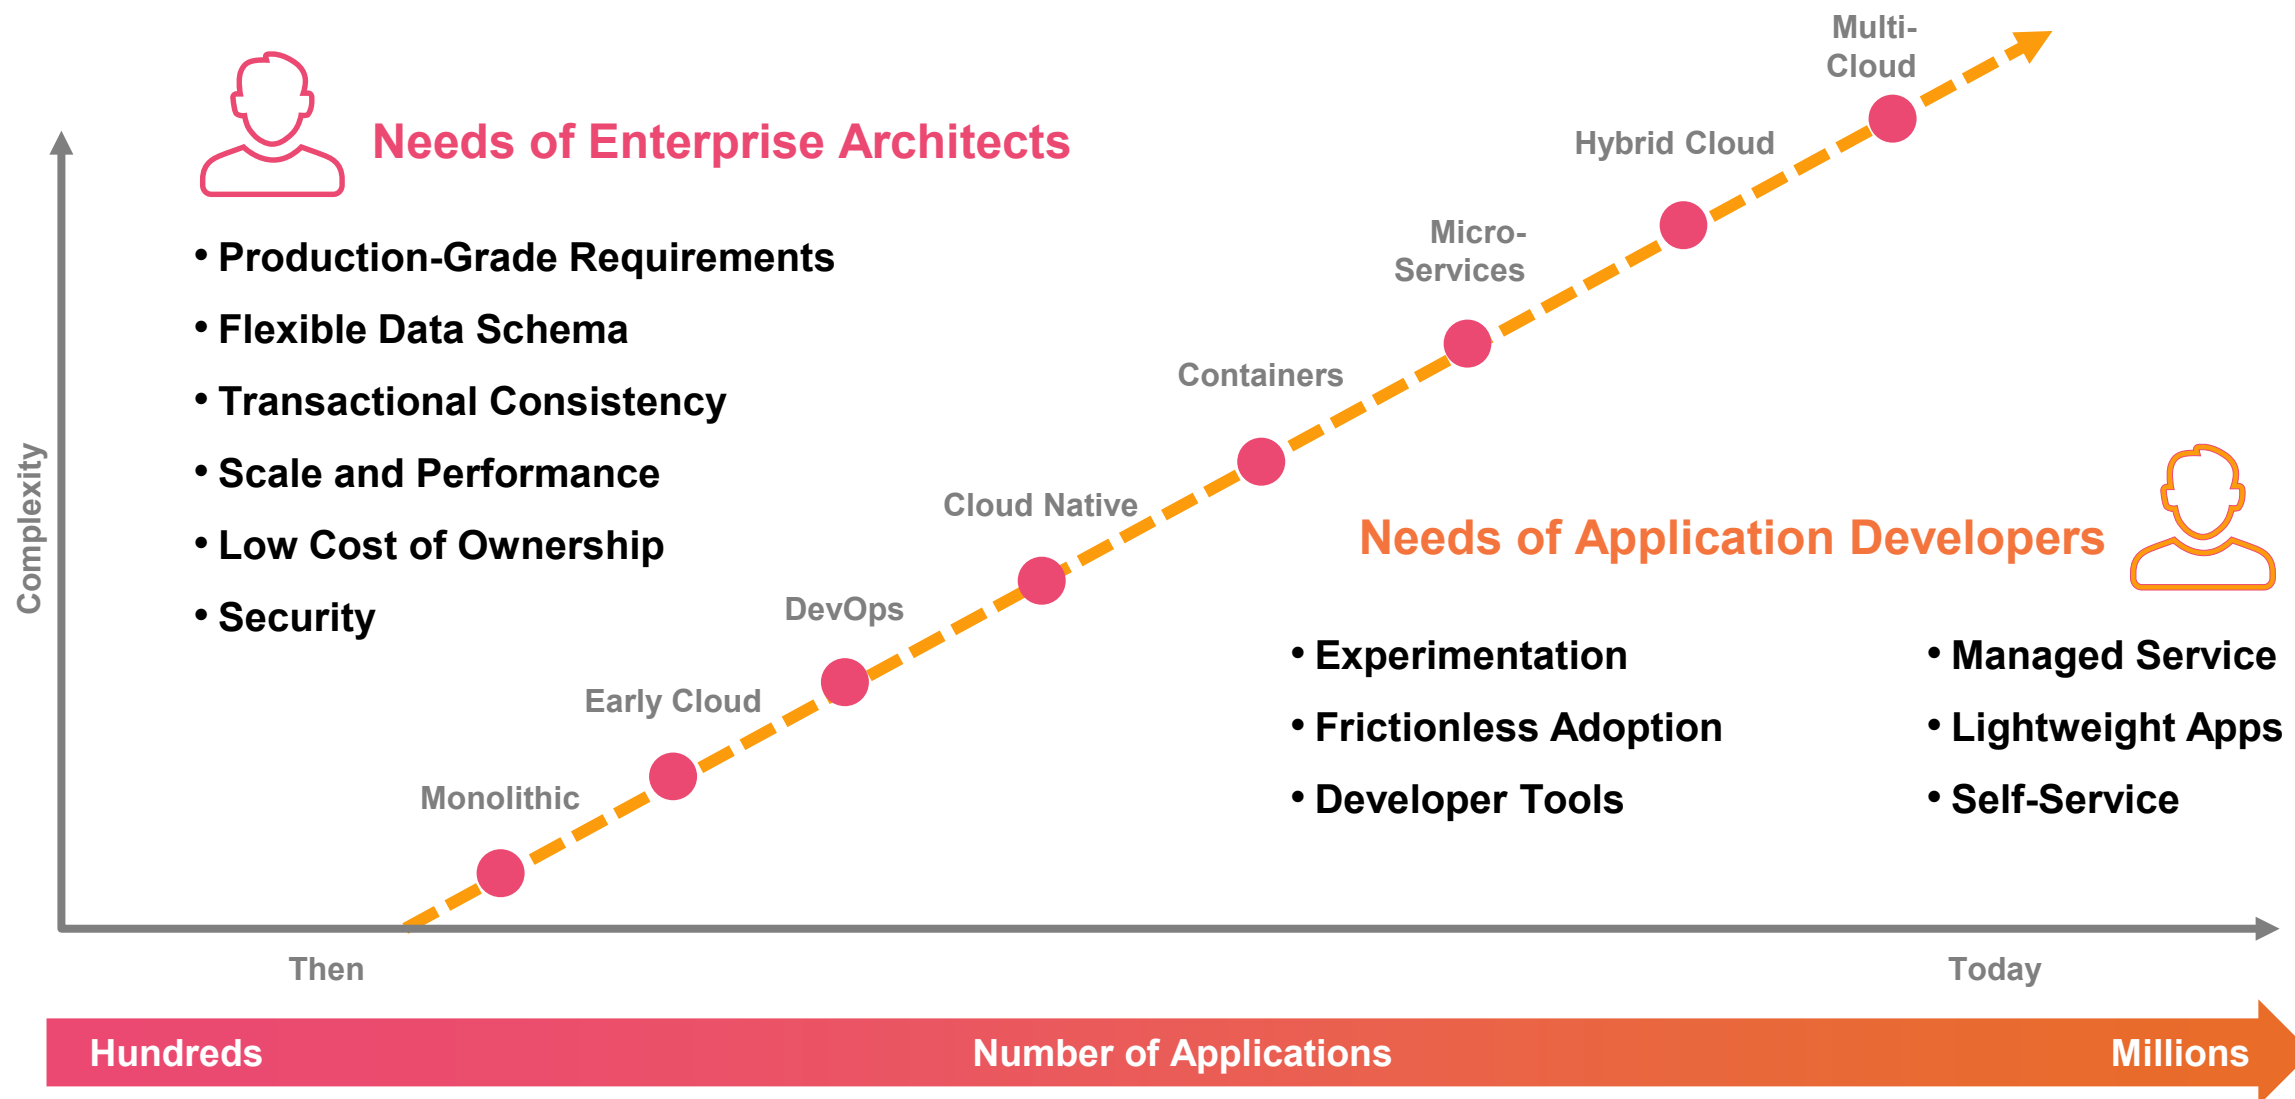

III. NoSQL Becoming Mainstream

- Develop and deploy apps
- New AND legacy applications
- Cloud migration a catalyst
- Relational offload critical
- Microservice adoption preferred
- Transactional support required
- Mobile & distributed support needed
- SQL compatibility matters

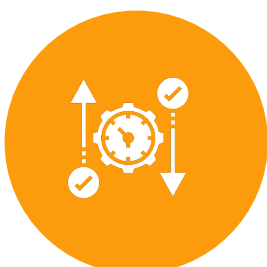

Couchbase Built for Business-Critical Applications

But Getting This Right is Extremely Challenging

Couchbase is The Answer - An Architecturally Differentiated Platform

1. Multi-Modal	2. High Performance	3. Flexible	4. Ease of Operation	5. Runs Anywhere
				
<ul style="list-style-type: none">• Key-value cache• Document datastore• ACID transactions	<ul style="list-style-type: none">• Memory-first architecture• Shared nothing design• Cloud-native scalability	<ul style="list-style-type: none">• Developer agility• SQL-based query language• Search, analytics, eventing	<ul style="list-style-type: none">• Kubernetes and cloud• Data center replication• Full-stack security	<ul style="list-style-type: none">• Public clouds• Private & hybrid clouds• Edge and mobile
Customer and Couchbase Managed				

Couchbase for Cloud – A Portfolio of Options

A carefully architected progressive cloud strategy for the enterprise

Further Couchbase Capella Investments

- Hosted DBaaS – AWS
- Developer Offerings
- Couchbase Server 7.0

- Hosted DBaaS - GCP

- Hosted DBaaS – Azure
- Mobile

Couchbase Capella

- A fully managed Database as a Service Offering (DBaaS) for the enterprise
- Low TCO and robust customizability, automated deployment, scaling, recovery, upgrades
- Intelligent cloud control plane across clouds, highly-available, highly secure, multi-region resiliency

Cloud-Native Core Platform

- A complete multi- and hybrid customer managed cloud platform
- Native Kubernetes support on all clouds, cross data center replication
- Built for micro-services (shared nothing architecture, independently scaled data services)

Customer Validated Market Leadership

*“Couchbase’s database makes it much **simpler for our engineers** to focus on what they do best: solving our customers’ business challenges... Our growing partnership will help us deliver the **enterprise-class performance, scale, flexibility, reliability** and traveler focus that our customers need, enabling us also to innovate more freely in key areas...”*

Sylvain Roy, SVP, Technology Platforms & Engineering, Amadeus

*“Couchbase provided us a **single platform for operational and analytical workloads** that enabled us to **deliver insights to our business partners in real time**. We were able to take things that we already knew about our customers and then combine that with new information to take action in hours vs. weeks or months previously...”*

Dan Djuric, VP Global Infrastructure and Enterprise Information Management, Domino’s

*“With Couchbase Cloud we have consolidated our infrastructure from **three different products into one simplified platform...**”*

Jeremy Groh, Principal Engineer, Facet Digital

*“We have received multiple awards for our OCEAN Guest Experience Platform, including the prestigious Red Dot award. Couchbase Server is critical to our success – **it delivers location-based, personalized customer interactions in real-time...**”*

Greg Sullivan, Chief Information Officer, Carnival Corporation

*“Couchbase Cloud has **the best pricing and performance we’ve seen from a DBaaS**. We’ve reduced total cost by 50% and increased performance by as much as 2,000% in key use cases.”*

Scott W. Bradley, Principal Engineer, Facet Digital

*“Quite simply, **Couchbase is business-critical for us**. As a NoSQL database, its ability to manage the vast number of interactions we process centrally and share that with all relevant devices in real time, means it can **ensure the best experience for our customers...**”*

Chris Bramley, Chief Technology Officer, TV & Broadband, BT

Clear Differentiation in the Large Operational Database Market

Traditional: Antiquated

- Rigid, inflexible schemas
- Dedicated DBAs required
- Complex per-core licensing

ORACLE

IBM

Other NoSQL: Limited

- Insufficient performance at scale
- Lack of SQL++ compatibility
- No single architecture (i.e. caching)

Bundled: Restricted

- Vendor lock-in
- No offline, edge capabilities
- Not built for mission-critical apps

Accelerating GTM by Combining “Buy-from” with “Sell-to”

Sell To

- 1 **Enterprise Architects** for mission-critical apps
 - 2 Direct sell through enterprise reps
- Continued capacity and efficiency investments

Buy From

- 1 **Application Developers** to drive adoption
 - 2 **Couchbase Capella** drives self-service access and awareness
- Expand developer community
Increased investment in developer UX

Independent Software Vendors

Systems Integrators

Cloud Partnerships
